SUMMARY

Frontend developer who designs, writes, and codes fast, SEO-ready websites with React, Next.js, Astro, and TypeScript. I ship client sites end to end, from design and build through analytics, DNS, and launch, the work many developers hand off. Comfortable on the backend with Supabase, Node.js, and PostgreSQL.

TECHNICAL SKILLS

- Frontend: TypeScript, JavaScript (ES6+), React, Next.js, Astro, HTML5, CSS3, Tailwind CSS, Framer Motion
- Backend & data: Supabase, Node.js, Express, PostgreSQL, REST APIs
- SEO & analytics: On-page SEO, structured data, Google Analytics, Google Tag Manager, Google Search Console
- Tools & deployment: Git, GitHub, Netlify, Vercel, WordPress, DNS configuration, Jira

PROJECTS

Fine Jewelry E-Commerce Store

Next.js · React · TypeScript · Tailwind CSS · Supabase · Netlify

- Building a concept storefront for a fine jewelry brand backed by a real Supabase product database.
- Implemented user accounts, plus a cart and wishlist that stay in sync across browser tabs.
- Typed end to end in TypeScript, with reusable UI components and Lucide icons.

JD Gallery: Photography Portfolio

Astro · TypeScript · Tailwind CSS · Netlify

- Designed and built an editorial portfolio for a photographer and videographer.
- Organized sports, wedding, real estate, and aerial work into categories that put the client's best shots first.
- Chose Astro to ship a mostly static, image-heavy site that loads fast.

Phil Strats: Travel Blog Showcase

Next.js · React · Tailwind CSS · Markdown · Buttondown · EmailJS · Google Tag Manager · Netlify

- Built a demo of the blog platform I offer clients, with Markdown-driven articles, dynamic routing, and search.
- Added a Buttondown newsletter signup and an EmailJS contact form.
- Built in SEO from day one: semantic HTML, meta tags, structured data, and analytics through Google Tag Manager.

Experience

Freelance Web Developer · 2025 – Present

- Design, build, and launch client websites end to end, including JD Gallery, a portfolio site for a photographer and videographer.
- Developed a reusable Next.js blog platform with Markdown content, newsletter signup, and analytics, offered to clients as a ready-made product.
- Deliver every site with on-page SEO, Google Analytics, and Search Console set up before launch.

Web Support Specialist · ollyolly.com · 2024 – 2025

- Handled a high volume of support requests across recurring and newly onboarded client WordPress sites, from plugin conflicts to broken layouts.
- Managed frequent site launches and migrations in a fast-paced agency, handling DNS configuration and go-live.
- Installed and customized WordPress themes to match client designs and requirements.
- Set up Google Analytics and Search Console so clients could track traffic and search performance.
- Worked in Agile sprints, tracking work in Jira, Slack, and HubSpot.

EDUCATION

UNF Coding Bootcamp (powered by Fullstack Academy) · Full-Stack Web Development · 2021 – 2022

- Six-month part-time program in the PERN stack (PostgreSQL, Express, React, Node.js), finishing with an e-commerce capstone.
